

**LEADING ENTERPRISE MANAGEMENT COMPANY ANNOUNCES PLATINUM SPONSORSHIP OF  
PREMIUM INTEGRATED BUILDINGS INDUSTRY EVENT**

***WebGen Systems, Inc. enrolls as a premium sponsor, active participant of BuilConn 2005***

**Cambridge, Mass.**— March 17, 2005 —WebGen Systems, Inc., provider of advanced software for energy conservation and control in commercial buildings, announced today it is a proud platinum sponsor of BuilConn 2005, the integrated and intelligent building community's premier conference and exposition being held in Dallas, Texas, March 21-24 at the Adam's Mark Hotel.

As a BuilConn platinum sponsor, WebGen Systems will take a center stage position in the support of whole building integration through the use of universally adopted IT technologies and strategies.

"We are very excited about participating in BuilConn 2005" said Mark Noyes, CEO and President of WebGen Systems, "WebGen continually strives to be an industry leader by offering the most effective Enterprise Energy Management solution to the marketplace, and BuilConn brings together the latest in the building systems industry and therefore is a perfect venue for us to showcase our technology."

"WebGen is an agile and energetic company that is furthering the interaction between buildings and the enterprise through innovative use of IT technologies," Anto Budiardjo, BuilConn organizer, said. "We are delighted to have WebGen Systems as a platinum sponsor of BuilConn and look forward to their active participation at BuilConn."

###

**About WebGen Systems, Inc.**

Headquartered in Cambridge, Mass., WebGen Systems, Inc. provides advanced software for energy conservation and control in commercial buildings. WebGen combines the highest level of industry expertise with a reliable suite of open-protocol software tools, called IUE<sup>®</sup>, to provide real-time command of energy use to generate savings. Its system connects all aspects of building energy management to automatically measure, monitor, and control energy consumption - building by building, system by system, meter by meter, and device by device. WebGen offers the most effective Enterprise Energy Management solution on the market today. Additional information can be found on the company website: [www.webgensystems.com](http://www.webgensystems.com).

**About BuilConn**

BuilConn is a four-day forum uniting integrators, manufacturers, distributors, consultants and technologists from the disparate disciplines of the building systems industry to learn and discuss the trends, technologies and their applications for tomorrow's "intelligent" buildings. From Access Control and HVAC to Lighting, CCTV and IT, BuilConn is the only network infrastructure and integration event focusing on bridging the gaps between these sectors to deliver true Networked Building Systems.

The third annual event will be held in Dallas, Texas, March 21-24, 2005, at the Adam's Mark Hotel Dallas. For further information, please visit [www.builconn.com](http://www.builconn.com).
